

# Lemma's disambiguation

## Summarium

This file provides an example of lemma's disambiguation.

All word which can potentially be twice (or more) in a same line is marked by an \sameword. *reledmac* prints the word rank only if the word is effectively printed twice (or more) time in the same line.

For use with \lemma, please read the handbook.

<sup>1</sup> Leo aut ursus aut oryx aut ricinus aut equus aut lupus aut canis aut felix aut asinus  
<sup>2</sup> aut burricus.
